-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 04 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-9,12-15,18** are rejected under 35 U.S.C. 102(b) as being anticipated by Ware (US 3772827).

For claim 1, Ware teaches a self-contained planter system comprising a water retaining box 20; an elevated first soil retaining box 26,25,50 disposed above at least a portion of the water retaining box; and a drain portal 35 in a lower portion of the soil retaining box and above at least the portion of the water retaining box, and adapted to drain into the water retaining box.

For claims 2 & 3, Ware teaches an elevated second soil retaining box 26,25,50 disposed above the first box and a drain portal 35 disposed in a lower portion of the second box, the drain portal of the second box being disposed above the first box and adapted to drain into the first box (see fig. 3).

For claim 4, Ware teaches a pump 21 coupled to the water retaining box.

For claim 5, Ware teaches a light 12 mounted above the soil retaining box.

For claim 6, Ware teaches a plurality of elevated soil retaining boxes 26,25,50, wherein the light 12 is below at least one of the boxes.

Art Unit: 3643

For claim 7, Ware teaches at least one of the soil boxes has an adjustable elevation (the brackets 14 are adjustable, thus, moving the soil boxes as desired, see col. 2, lines 61-62) relative to the water box.

For claim 8, Ware teaches a columnar support 11 for the soil box.

For claim 9, Ware teaches a structural bollard 16 coupled to the columnar support.

For claim 12, Ware teaches plants planted in the soil retaining box.

For claim 13, Ware teaches a self-contained planter system comprising a water retaining box 20; elevated soil retaining boxes 25,26,50; a water line 22; a pump 21; a light 12. See also the claims explanation in the above.

For claim 14, see claim 8.

For claim 15, see claim 9.

For claim 18, see claim 7.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 10 & 16** are rejected under 35 U.S.C. 103(a) as being unpatentable over Ware (as above) in view of Morris et al. (US 5216836).

Morris et al. teach a self-contained planter system comprising a control panel 16.

It would have been obvious to one having ordinary skill in the art at the time the

Art Unit: 3643

invention was made to employ a control panel as taught by Morris et al. in the system of Ware in order to automatically regulate the volume and rate of flow of the nutrient (col. 2, lines 57-60 of Morris et al.).

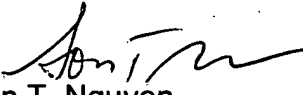

5. **Claims 11 & 17** are rejected under 35 U.S.C. 103(a) as being unpatentable over Ware (as above) in view of FR2739253 (herein FR253).

FR253 teaches a self-contained planter system comprising an enclosure (on the left side of box 1 in fig. 1 where ref. 23 is located) formed in a water retaining box 1 and accessible from an exterior portion of the water retaining box (by removing the lid 3), the enclosure housing a drain valve 23 sealingly coupled to a water portion of the water retaining box. It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ a drain valve in an enclosure as taught by FR253 in the water retaining box of the system of Ware in order to allow drainage of the water in the water retaining box and to provide an enclosure for the valve.
